Abstract (en)
[origin: WO2005088043A1] The invention relates to a panic door opening device comprising a handle (1), which is pivotally mounted on a door. The upper area of a plate of a door lock is used for mounting, and a universal support (2) is provided on which a bracket (3) for mounting a coupling area (4) of the handle (1) is formed, and which is designed so that it fits differently dimensioned door locks that are to be used, and can be combined with at least one cover (7, 8).
