Abstract (en)
[origin: EP1726454A1] Scribing machine (1) comprises a body (2) with scribing units for scribing a pattern and a first adjusting element which moves from a ready position into a contact position to fix the scribing machine to a base. The adjusting element is less raised than a rotating tip (6) provided as a further adjusting element so that only the rotary tip or both adjusting elements are moved in the contact position by different directing of a rocker (4). Preferred Features: The first adjusting element has several tips arranged on the same rocker and comprises a slip-resistant contour molded to the rocker.
