Abstract (en)

[origin: EP1726504A2] The railway goods wagon (1), or multi-section wagon group of the same type, has a length over buffer, or length over coupling, of about 11.25 m. The load space (2) of the wagon is designed for a carrying capacity of about 70 tons. The wagon construction-wise is designed for a route meter load of 8 t/m maximum, with a maximum wheelset load of 22.5 t. The running gear is formed by two two-axle bogies (3), and an unloading door is located per side. The volume of the load space has a volume of about 42 cubic meters.
