Abstract (en)
A kayak (10) comprises a deck (14) or a top part including a manhole, and a hull (10) or bottom part defining a stern or leading edge and a stern or trailing edge, the deck being joint to said hull. The hull defines a specific overall length, a maximum width and a maximum frame, and has a centre of buoyancy located behind the centre of said hull, such as at a position at a distance constituting 51-53%, such as 51-52%, preferably approximately 51.5% of said specific overall length from said stern or leading edge. The hull further defines a prismatic ratio larger than 0.6, such as 0.6-0.70, e.g. 0.62-0.68, preferably 0.63-0.66, most preferably approximately 0.64, or a prismatic ratio of 0.60-0.61; 0.61-0.62; 0.62-0.63; 0.63-0.64; 0.64-0.65; 0.65-0.66; 0.66-0.67; 0.67-0.68; 0.68-0.69; 0.69-0.70, preferably approximately 0.63-0.64 or 0.64-0.65.
