Abstract (en)

Lid has an edge (2) to connect it tightly and durably with a container body consisting of hull and bottom and a smooth central area embodied as panel or lid surface (3) on which a pin- or column-shaped guide element(s) (7,8) juts out from one side essentially parallel to the vertical axis (9) of the lid's surface. The columns can have additional elements which form one functional unit with the lid.
