Abstract (en)
Device for collecting printed products (2) to form a book block comprises a continuous traction device to which are fixed conveying elements (7) for receiving printed products and running in the region of a conveying path in a guiding strip. The conveying elements have a bearing surface (8) and a wall (9) for the printed products. Preferred Features: The bearing surface is delimited by the wall on the front end and is inclined toward the wall. The wall is aligned perpendicularly to the bearing surface.
