Abstract (en)

[origin: EP1726711A2] Device for positioning damp washing (8) in a drum (1) of a clothes dryer comprises a base element (6) and connecting elements (4, 5) for positioning and/or fixing the base element to the drum. An independent claim is also included for a drum for a clothes dryer. Preferred Features: The base element has one or more storage compartments (7) and a flexible flat element. The base element can be collapsed or folded and is air-permeable in a partial region. At least one of the connecting elements has a flexible section.
