Abstract (en)

Base support construction comprises posts (1a, 1b, 1c) and cross-struts (2a, 2b, 2c), in which each strut is exactly joined on each end to a post. The cross-struts form the sides and the posts form the tip of a triangle. An independent claim is also included for a composite structure comprising a base support construction and a cube-like container for holding people. Preferred Features: Two of the three cross-struts are the same length forming a triangle having the same length sides. The posts are arranged parallel to each other.
