Abstract (en)

[origin: EP1726737A2] A tile (401) having a front face (202) for displaying and an underside (203) for securing to a tile support surface, the underside having a closed path seal wall (204) extending backwards. The seal wall is configured to provide a seal between the tile and a tile support surface to prevent substance ingress interior of the closed path of the seal wall. A tile having a seal wall also configured to provide a seal between the tile and a second like tile. A tile having an underside that presents tile coupling means configured to communicate with tile support coupling means to provide a first releasable coupling arrangement. A tile support board (404) having a rear face for securing to a support surface and a front face providing a tile support surface and presenting tile support coupling means, such that the tile may be releasably coupled to the tile support board.
