Abstract (en)

[origin: DE202005008338U1] The configuration has a combination of transducers integrated into units of roof regions (2, 3, 4) of a motor vehicle. Another set of transducers is arranged in openings of an interior lining and below a belt line of the vehicle. Bulk connection for transducers is arranged in a roof system, and over a springy contact that is between movable metallic components of the roof system and a metallic carriage (1) of vehicle.
