Abstract (en)

The lamp has a light head (11) with a light source (15), and an installation unit (12) with an installation storage in which information about the head can be registered. The head is assigned to a light head storage (18), which is separated from the installation storage and containing light head related data. The light head related data is readout from the storage (18) and registered in the installation storage. The installation unit is connected with a controller of a control system through a signal line for a set of lamps.
