Abstract (en)

[origin: WO2005094949A1] The invention relates to a position sensor (3) for a movement analysis method, in particular for golf training. According to the invention, the position sensor (3) can be detachably mounted on ball sports equipment (2) and receives or emits at least one position signal for determining the three-dimensional position and/or alignment of the ball sports equipment (2). The invention also relates to a movement analysis system that uses the inventive position sensor.
