Abstract (en)

[origin: WO2005090375A1] The invention relates to a method for enriching trehalose from solutions, wherein the enrichment is performed with the aid of an adsorbent. The invention is characterized in that the adsorbent is an alumosilicate. The alumosilicate is preferably a zeolite. The invention also relates to the enrichment and purification of trehalose from fermentation broths, more particularly as coupled product from the fermentative production of other value products.
