Abstract (en)  
[origin: WO2005088050A1] The invention relates to a door closer or the like comprising a housing (1). A cover (13) can be mounted on the housing (1), and the housing (1) is closed on each face by an end cap (16) having an outward pointing end face. In order to create a novel door closer that is visually appealing, the invention provides that the cover (13) extends up to the plane of the end face.
