Abstract (en)

[origin: WO2005083286A2] The invention relates to an actuating mechanism (1) for manually actuating at least one Bowden cable (90). Said mechanism comprises a reel (40), which can be connected to an inner cable (92) of the Bowden cable (90) and a follower body (30) that can be connected to an actuating lever (100), the reel (40) and the follower body (30) being rotationally mounted about a common rotational axis and adopting the same axial position on the rotational axis.
