Abstract (en)  
[origin: WO2005090882A1] The invention relates to a fitted refrigerated device comprising a body (2) and a door (3) that is hinged to the front side of the body (2), the body and the door together surrounding a thermally insulated interior (4), and comprising a base unit (8') that is connected to the underside (5) of the body (2). The underside (5) comprises a front region (6), which faces the door (3) and with which a connecting section (11) of the base unit (8') engages and a rear region (7), which is not connected to the base unit (8').
