Abstract (en)

[origin: FR2867184A1] Optical fiber has a multilayer sheath in which one layer (L1) comprises the reaction product of a polyether urethane (meth)acrylate oligomer and two (meth)acrylate monomers and another layer (L2) comprises the reaction product of a polyether urethane (meth)acrylate oligomer, an epoxy (meth)acrylate oligomer and two (meth)acrylate monomers. An independent claim is also included for stripping an optical fiber by contacting an optical fiber as above with a stripper.
