Abstract (en)
[origin: EP1728597A2] The housing (11,13) is of a brick shape with a longitudinal opening (15) in its upper side. The opening (15) is closed with a matching lid (14). Electronic components (17) such as light emitting diodes (18) or plugs and sockets (19), all attached to an imprinted circuit board (20), are accommodated in the space (16) inside the housing (11) and surrounded by an embedding material (23). Several cylindrical sleeves (26,27) are guided from the lid (14) towards the bottom of the container (13), allowing access to the objects (17,18,19) at the bottom.
