Abstract (en)

[origin: EP1728943A1] The device has a support (10) and a strike wire (12) fixed on a support panel (20). The support has lateral walls (42) connected to the panel and a base connected to the walls at the opposite of the panels, where the walls are deformed between deployed and folded positions. Each wall is connected to the panel and a base plate (44) fixed on the vehicle and two opposite lateral walls (46) which are connected to the panel at an end and free at another end.
