Abstract (en)
The aid (1) has a bending resistant plate shaped support part (5) for information unit e.g. printed paper sheet. A transparent cover (6), covering the unit, is designed as part of a jacket part having a back. The cover is stuck on the part (5) by adhesion. The cover is arranged edge laterally for direct detachable detention connection with the part (5), where durable working and reusable adhesion is provided for edge lateral sealing. The cover attached to the support part and/or the support part attached to the cover is applied with soft polyvinyl chloride layer.
