Abstract (en)

[origin: WO2005105394A1] The invention relates to an electrical hair removal apparatus (1), in particular, a shaver or an epilator, for partially or fully removing hair from the skin. The inventive hair removal apparatus (1) comprises a housing (2) and an application element (9), for applying a fluid onto the skin, arranged outside the housing (2). The particularity of the inventive hair removal apparatus (1) lies in the fact that said application element (9) is embodied as a fluid reservoir, housing the total fluid reserve of the hair removal apparatus (1).
