Abstract (en)
[origin: WO2005090102A1] The present invention relates to a coupling device (1) for connecting an implement (6) or the like to a vehicle (2). The coupling device comprises a first coupling part (10) connected to the vehicle, preferably to the frame side members (3) of the vehicle, comprising an upper point of attachment (11) and a lower point of attachment (12), and a second coupling part (20) connected to the implement (6), comprising a corresponding upper point of attachment (21) and a corresponding lower point of attachment (22). The first coupling part (10) also has a first part (13) attached to a first frame side member (3) and a second part (14) attached to a second frame side member (3). Both parts (13, 14) comprise an upper point of attachment (11) and a lower point of attachment (12).
