Abstract (en)

[origin: WO2005095718A1] A reinforced soil retaining wall system (10) in which a plurality of blocks (12) are arranged in courses (14) to form a wall (16). Soil reinforcement is provided to the wall (16) using a plurality of lengths of strip reinforcement (18) inserted in and extending from the blocks (12), the strip reinforcement (18) being buried under compacted backfill (20) either as each course (14) is laid or after construction of the wall (16). Also disclosed is the use of a second plurality of sections of soil reinforcement, spaced apart from the first plurality of sections and arranged to extend perpendicular to the wall.
