Abstract (en)

[origin: WO2005089735A2] The invention features a method for inhibiting growth of a cancer cell by contacting the cell with a composition of a PKP3, CDCA1, CDCA8, DLX5, URLC11 or NPTX1 siRNA. Methods of treating cancer are also within the invention. The invention also features products, including nucleic acid sequences and vectors as well as to compositions comprising them, useful in the provided methods. The invention also provides a method for inhibiting of tumor cell, for example lung cancer cell, particularly NSCLC.
