Abstract (en)  
[origin: EP1580626A1] The device has a control lever (14) situated outside a volume (8) of a case (1) and actuatable by a user. An actuating lever (16) is situated inside the volume and cooperates with an indicator mechanism (46) whose information is to be corrected. The control lever and the actuating lever are connected by a rotary connecting body (18) that rotates around a general symmetric axis (X-X).
