Abstract (en)
[origin: WO2005093767A1] The invention relates to a device (1), for winding a coil core (2, 2') with a wire, for production of solenoids with at least one rotation plate (3), for turning the coil core (2, 2'), which is essentially enclosed by a housing (5), whereby the housing (5) comprises at least two independent housing pieces (6, 6'), at least one housing piece (6, 6') being arranged such as to be displaced and at least one housing piece essentially extending over the entire height of the coil core (2, 2').
