Abstract (en)

The links have two caps (3, 4) with heads (3a, 4a) whose section is greater than the feet (3b, 4b) traversed by a channel (7) for the passage of a connecting member with friction. T-shaped shoulders formed between the heads and feet hold a decorative part (9). The length of the feet forms a space (16) when the feet cooperates with the inner wall of a tube (15), where the space housing a compressive insert (6) is arranged between the bottom of a female part and an end of a male part.
