Abstract (en)
[origin: EP1731200A1] The invention relates to a tool for the safety of mountaineers or users who are likely to fall while travelling along paths with fixed safety ropes, of the type comprising a connecting element between a rope or the like, which is suitable to be fastened to the user and a pair of belts or ropes having free ends that can be attached to the fixed rope or the like. In order to avoid crossing the belts, the latter are connected to the connecting element via a pin that can be rotated about an axis.
