Abstract (en)

[origin: EP1731201A1] The device has a hook which is connected with a ski adhesive coat and with the front or rear ends of a ski. The hook has two plate-shaped parts (7, 8) which are connected with one another. The front or the rear end of the ski adhesive coat is clamped between the parts, and the parts accommodate a fixing part (16) such as wire or clamp. The fixing part fixes the hook at a ski tip or at the rear end of the ski.
