Abstract (en)  
The pallet has a rectangular tray (1) with branches (3-1, 3-2) constituting four sides of the pallet and receiving legs (2-1, 2-2, 2-3). The median branches (4-1, 4-2) connect the intermediate legs, where the branches (3-1, 3-2) and median branches are cut into round holes. The legs (2), in the form of a truncated pyramid, are hollow and emerge in the top of the tray. The legs comprise a rib (8) forming a support for the leg. The legs and the tray are made of the same material such as a polymer.
