Abstract (en)  
A dewatering device for a water jet loom includes a dewatering pipe disposed on a take-up path of a woven cloth and having a suction hole that extends in a weaving width direction and that comes into contact with the woven cloth and an airtight sheet disposed so as to cover the suction hole from above the woven cloth and having a sheet surface that comes into contact with the woven cloth. At least one of an outer peripheral portion of the dewatering pipe and the sheet surface of the airtight sheet has guide walls that are arranged along the weaving width direction with intervals therebetween and that extend in a direction that intersects the weaving width direction over a section that covers the suction hole.
