Abstract (en)

A cleaning apparatus especially for paper production plants, comprising: a storage case (4) having a substantially box-like shape, and means (6) for sucking air around a respective plant (1) for the production of paper (3). The suction means (6) are associated with the storage case (4) to convey air to a chamber (5) formed in the same case (4). The apparatus also exhibits filter means (7) consisting of water held within the chamber (5) to retain solid impurities entrained by the sucked air.
