Abstract (en)  
The device has a thin laminar flat material provided as a carrier (20), where the material is different from a stove top plate and forms an operating area for contact switch for operation. Sensor units are provided on a rear side of the carrier, and include a contacting running from the sensor units to contacting devices at the carrier for electrically contacting at an operating device (18) of a stove top (13). Independent claims are also included for the following: (1) a stove top with a control device and sensor device (2) an arrangement of a stove top in a cutout of a worktop.
