Abstract (en)
The truck has an electronic controller for driving and hub functions and a data transmission device (15) for transmission of vehicle-based data, data for recognition and removal of malfunction and interferences and operational data that is operation hours, driven distance, load weights, battery charge, operating temperature of primary components and operating auxiliary materials. The device is formed as an RFID transmitting and receiving unit. An independent claim is also included for a communication system for wireless data transfer comprising an industrial truck.
