Abstract (en)
An electrical connection arrangement (200,300) comprises a spark plug terminal (203,303) and an ignition coil terminal (202,302). A first spring (242,348) is arranged to engage the spark plug terminal (203,303) and bias the spark plug terminal (203,303) towards the ignition coil terminal (202,302). A second spring element (246,350) is arranged to engage the spark plug terminal (203,303) and to at least partially oppose the biasing of the first spark plug terminal (203,303) by the first spring element (242,348).
