Abstract (en)  
[origin: WO2005094771A1] The invention relates to formulations comprising fats and natural oils that contain an osmolyte originating from extremophilic micro-organisms and unsaturated fatty acids. According to the invention, the osmolyte is present in a concentration of between 0.01 and 50 wt. % of the total weight of the composition. The invention also relates to the use of osmolytes originating from extremophilic micro-organisms for stabilising unsaturated fatty acids. A preferred combination consists of the osmolyte and evening primrose oil (Oleum Oenotherae).
