Abstract (en)
[origin: WO2005095020A2] The invention relates to an inserting element insertable into a casting mould which is provided with a metal casting cavity. The inventive inserting element consists of a body (3) having a cavity (6) extending along the longitudinal axis (7) of the body and a first moulded body (4) provided with a opening (10) connecting the body cavity (6) to a moulding cavity and a second moulded body (5) which is applied to the first moulded body (4), wherein the first moulded body is embodied in the form an energy absorbing device.
