Abstract (en)
[origin: WO2005085410A1] The invention relates to particles, particularly washing, cleaning and/or care product particles, having a bulk weight greater than 450 g/l, particularly 500 g/l to 1200 g/l, characterized in that the particles have a compound mixture and fine-particulate surfactant particles, which have a particle diameter d₅₀ ranging from 0.05 mm to 0.6 mm, a dust value of = 0 % to a maximum of 0.1 %, at least 1 % by weight to a maximum of 30 % by weight of a surfactant, and at least 10 % by weight to a maximum of 40 % by weight of sodium carbonate. The indicated weights refer to the total weight of the fine-particulate surfactant particles, comprise, at least in part, discrete surfactant particles, and have a dust value ranging from = 0 % to = 0.2 %.
