Abstract (en)

[origin: WO2005098115A1] The invention relates to a control unit (23) for thread feeding devices (18, 19) generating for said thread feeding devices pattern or switch data control signals transmitted by a pattern memory (28) or data signals differently received from a knitting machine (1). Said control unit also adds or subtracts pattern data and advance or lag angles which are related to the rotation of a needle cylinder (1) and set specifically for the machine.
