Abstract (en)

[origin: WO2005096395A1] The invention relates to a metal substrate for a solar cell. According to the invention on the metal substrate a layer of molybdenum or molybdenum alloy is present that has been applied by a Physical Vapour Deposition (PVD) process, the layer of molybdenum or molybdenum alloy being at least essentially pore free. The invention also relates to a metal strip for producing such metal substrates and to a method for producing such a metal strip, and to a photovoltaic solar cell comprising such a metal substrate.
