Abstract (en)

[origin: EP1733652A1] The frame has various zones such as shoulder and pelvic zones, which are adjustable in inclination and/or height. Multiple spring units are received in clip connectors (2). The spring units are formed as fixed foam bodies (3) on or at the connectors. The foam bodies are provided with receiving sections for encompassing or overlapping the connectors, where foam bodies can be produced in different hardness, colors and surface textures.
