Abstract (en)

[origin: EP1734186A1] The method for producing trackways for magnetic levitation transport systems whose upper surface is formed from precision steel plates comprises casting concrete dummy panels (3), in which the plate mountings (4) are embedded. The panels are then removed and the steel plates manufactured using them as a template. Independent claims are included for: (A) Metal plates for use in making the trackways; and (B) the dummies.
