Abstract (en)

[origin: DE202005009604U1] The centre contact for use with the gas discharge bulb is at the tip [7] of an 'S' shaped spring element [1]. The contact element is produced as a one piece metal pressing from strip material. The lower end is formed with a crimping section [29] so as to fix the electrical wire. The contact fits in a holder and is engaged by an inserted bulb.
