Abstract (en)  
[origin: WO2005089803A2] The present invention relates to pharmaceutical compositions for the treatment of skin diseases. Particularly, the compositions described in the present invention are highly effective for the treatment of skin diseases associated with allergic reactions among a variety of symptoms derived from skin diseases. These compositions comprise an antihistaminic-effective amount of epinastine or a pharmaceutically acceptable salt thereof and one or more additional pharmaceutically acceptable minerals or one or more pharmaceutically acceptable crude drugs. The compositions may also comprise pharmaceutically acceptable additives.
