Abstract (en)
[origin: WO2005099799A1] The invention relates to a respiratory device for ventilating a patient. Said respiratory device comprises a respirator that is or can be linked with an endotracheal tube or a respiratory mask. The respiratory device is provided with a control/regulation unit (1) for controlling and checking the expiration phase and with actuators (2, 3) controlled by said unit for actively influencing expiration and producing any expiration pattern during the expiration phase.
