Abstract (en)  
The arrangement has two hinges (2,3) that act together in a flexible manner by a pivot pin (4) around a defined common axis of rotation (21). A heater is provided, where a heating unit (5) of the heater is brought in a recess (18) of the pivot pin and covered outwards. The recess of the pivot pin is guided in a precisely fitting manner to a cross-section of the heating unit.
