Abstract (en)  
[origin: EP1736419A1] The container has a casing (2) that is polygonal in cross section and a support arranged in a sloping manner inside the casing. A collecting region of the support is connected with an outlet opening (5) at the casing for conveying the liquid. The support is conically supported by a section. The section is attached with the casing. A passage duct is arranged between the collecting region and the outlet opening.
