Abstract (en)

The machine has a card component e.g. false floor, mounting and dismounting system (2) comprising a moving carriage (20) which is mounted on two parallel guide rails (21). The guide rails permit to guide the carriage in translation with respect to the ground and are positioned under cylinders of the card e.g. cotton card. The carriages comprise castors (201) and rests on the guide rails by utilizing the castors. The system has a carrier unit (22) which is adjustable in height and supports the card component.
