Abstract (en)

[origin: EP1736578A2] A band-shearing unit (1) has a first measuring device (16) for determining winding length of bands (3) and a control device (18) for controlling winding lengths of bands on a shearing drum (2) at a presetable target length from a second band (3''). The winding lengths of all bands can be controlled. The target length can be fixed by the first band (3'). An independent claim is also included for a method for producing a weaver's beam.
