Abstract (en)
Laundry dryer comprising a rotatable drum (1) with at least a lifter (2) for moving the laundry as the drum (1) rotates, the lifter (2) is adapted to house a winding mechanism (3) for a pliable member (4) to be wound and unwound, said pliable member (4) is slidably changeable from a first position, in which the pliable member (4) is contained inside the lifter (2), to a second position, in which the pliable member (4) extends into the drum (1) and is adapted to be associated with the drum (1) so as to divide the latter into separate compartments.
